

Test Report issued under the responsibility of:

## TEST REPORT

### IEC 62368-1

## Audio/video, information and communication technology equipment

### Part 1: Safety requirements

**Report Number** ..... : 210616008SZN-001

**Date of issue** ..... : August 16, 2021

**Total number of pages** ..... : See page 4 for details

**Name of Testing Laboratory preparing the Report** ..... : Intertek Testing Services Shenzhen Ltd. Longhua Branch

**Applicant's name** ..... : LOUD AUDIO, LLC

**Address** ..... : 19820 North Creek Parkway #201Bothell, WA 98011-8227, United States of America

#### Test specification:

**Standard**..... : IEC 62368-1:2014

**Test procedure** ..... : CB Scheme

**Non-standard test method** ..... : N/A

**TRF template used**..... : IECEE OD-2020-F1:2020, Ed.1.3

**Test Report Form No.** ..... : IEC62368\_1D

**Test Report Form(s) Originator** .. : UL(US)

**Master TRF** ..... : Dated 2021-02-04

**Copyright © 2021 IEC System of Conformity Assessment Schemes for Electrotechnical Equipment and Components (IECEE System). All rights reserved.**

**Copy of marking plate:**

The artwork below may be only a draft. The use of certification marks on a product must be authorized by the respective NCBs that own these marks.

Rating Label for model DL32S

Rating Label for model DL16S

**Remark:**

- The above markings are the minimum requirements required by the safety standard. For the final production samples, the additional markings which do not give rise to misunderstanding may be added.
- Above information was labelled or silk-screened on rear enclosure.
- The CE marking and WEEE symbol (if any) should be at least 5.0 mm and 7.0 mm respectively in height.

| <b>GENERAL REMARKS:</b>   |   |
| <p>“(See Enclosure #)” refers to additional information appended to the report.</p> <p>“(See appended table)” refers to a table appended to the report.</p> <p>Throughout this report a <input type="checkbox"/> comma / <input checked="" type="checkbox"/> point is used as the decimal separator.</p> <p>Determination of the test conclusion is based on IEC Guide 115 in consideration of measurement uncertainty.</p> <p>This report is for the exclusive use of Intertek's Client and is provided pursuant to the agreement between Intertek and its Client. Intertek's responsibility and liability are limited to the terms and conditions of the agreement. Intertek assumes no liability to any party, other than to the Client in accordance with the agreement, for any loss, expense or damage occasioned by the use of this report. Only the Client is authorized to permit copying or distribution of this report and then only in its entirety. Any use of the Intertek name or one of its marks for the sale or advertisement of the tested material, product or service must first be approved in writing by Intertek. The observations and test results in this report are relevant only to the sample tested. This report by itself does not imply that the material, product, or service is or has ever been under an Intertek certification program. The test report only allows to be revised only within the report defined retention period unless standard or regulation was withdrawn or invalid.</p> <p>The clause which indicated with * is the subcontract test item. (if there is subcontracting test).</p> |   |
| <b>Manufacturer's Declaration per sub-clause 4.2.5 of IEC 60068-2-1:</b>  |   |
| The application for obtaining a CB Test Certificate includes more than one factory location and a declaration from the Manufacturer stating that the sample(s) submitted for evaluation is (are) representative of the products from each factory has been provided .....   | <input type="checkbox"/> Yes<br><input checked="" type="checkbox"/> Not applicable  |
| <b>When differences exist; they shall be identified in the General product information section.</b>   |   |
| <b>Name and address of factory (ies) .....</b>  | <b>Factory Name:</b> Dongguan Longjoin Electronics Co Ltd<br><b>Factory Address:</b> Gong Ye Da Dao, Shui Lang Village, Dalingshan Town, DONGGUAN CITY Guangdong Province 523820, China |

**General product information and other remarks:****Product Description –**

The products covered by this report is Portable Mixer. it can be supplied by AC mains only via detachable power cordset, which are classified as Class II equipment and for pollution degree 2 locations and indoor use only.

There are two type approved internal power supply board (model EPS-45S-12 and EPS-65S-12), power supply board with model EPS-45S-12 was used for product model DL16S, and power supply board with model EPS-65S-12 was used for product model DL32S.

**Model Differences –**

All the models covered in this report are the same as each other for trading purpose, except for the following:

- For model DL32S, product size: 185 mm x 447 mm x 147 mm, equipped with 32 pcs input channels;
- For model DL16S, product size: 142 mm x 358 mm x 147 mm, equipped with 16 pcs input channels.

**Additional application considerations – (Considerations used to test a component or sub-assembly) –**

N/A

| <b>ENERGY SOURCE IDENTIFICATION AND CLASSIFICATION TABLE:</b>   |                                   |
|---|-----------------------------------|
| (Note 1: Identify the following six (6) energy source forms based on the origin of the energy.)<br>(Note 2: The identified classification e.g., ES2, TS1, should be with respect to its ability to cause pain or injury on the body or its ability to ignite a combustible material. Any energy source can be declared Class 3 as a worse case classification e.g. PS3, ES3.) |                                   |
| <b>Electrically-caused injury (Clause 5):</b><br>(Note: Identify type of source, list sub-assembly or circuit designation and corresponding energy source classification)<br>Example: +5 V dc input   |                                   |
| ES1   |                                   |
| Source of electrical energy   | Corresponding classification (ES) |
| Circuit supplied by AC mains (primary)  | ES3                               |
| Output of the Internal power supply   | ES1                               |
| All accessible output port and enclosure  | ES1                               |
| <b>Electrically-caused fire (Clause 6):</b><br>(Note: List sub-assembly or circuit designation and corresponding energy source classification)<br>Example: Battery pack (maximum 85 watts):   |                                   |
| PS2   |                                   |
| Source of power or PIS  | Corresponding classification (PS) |
| All internal circuits   | PS3 (declared)                    |
| <b>Injury caused by hazardous substances (Clause 7)</b><br>(Note: Specify hazardous chemicals, whether produces ozone or other chemical construction not addressed as part of the component evaluation.)<br>Example: Liquid in filled component   |                                   |
| Glycol  |                                   |
| Source of hazardous substances  | Corresponding chemical            |
| --  | --                                |
| <b>Mechanically-caused injury (Clause 8)</b><br>(Note: List moving part(s), fan, special installations, etc. & corresponding MS classification based on Table 35.)<br>Example: Wall mount unit  |                                   |
| MS2   |                                   |
| Source of kinetic/mechanical energy   | Corresponding classification (MS) |
| Equipment mass < 7 kg   | MS1                               |
| Rounded edges and corners for equipment mass  | MS1                               |
| <b>Thermal burn injury (Clause 9)</b><br>(Note: Identify the surface or support, and corresponding energy source classification based on type of part, location, operating temperature and contact time in Table 38.)<br>Example: Hand-held scanner – thermoplastic enclosure   |                                   |
| TS1   |                                   |
| Source of thermal energy  | Corresponding classification (TS) |
| External surface of the apparatus   | TS1                               |
| <b>Radiation (Clause 10)</b><br>(Note: List the types of radiation present in the product and the corresponding energy source classification.)<br>Example: DVD – Class 1 Laser Product  |                                   |
| RS1   |                                   |
| Type of radiation   | Corresponding classification (RS) |
| LED indicator   | RS1                               |

#### ENERGY SOURCE DIAGRAM

Indicate which energy sources are included in the energy source diagram. Insert diagram below

Supplementary information:

- 1) Provided evidence ensures the agreed level of compliance. See OD-CB2039.
- 2) The power cordset was not evaluated together with the apparatus. A suitable certified power supply cord set has to be added in the country where the apparatus is sold.
- 3) A separately approved power cord that incorporates plugs which complies with the special national requirements shall be provided with this apparatus when be marketed in the specified countries.

| <b>IEC 62368-1 - US and Canadian National Differences</b><br><b>Special National Conditions based on Regulations and Other National Differences</b> |   |  |     |
|---|---|--|-----|
| 1.1   | All equipment is to be designed to allow installation according to the National Electrical Code (NEC), ANSI/NFPA 70, the Canadian Electrical Code (CEC), Part I, CAN/CSA C22.1, and when applicable, the National Electrical Safety Code, IEEE C2.<br>Also, for such equipment marked or otherwise identified, installation is allowed per the Standard for the Protection of Information Technology Equipment, ANSI/NFPA 75. |  | N/A |
| 1.4   | Additional requirements apply to some forms of power distribution equipment, including sub-assemblies.  |  | N/A |
| 4.1.17  | <i>For lengths exceeding 3.05 m, external interconnecting flexible cord and cable assemblies are required to be a suitable cable type (e.g., DP, CL2) specified in the NEC.</i>   |  | N/A |
|   | <i>For lengths 3.05 m or less, external interconnecting flexible cord and cable assemblies that are not types specified in the NEC generally are required to have special construction features and identification markings.</i>  |  | N/A |
| 4.8   | Lithium coin / button cell batteries have modified special construction and performance requirements.   |  | N/A |
| 5.6.3   | Protective earthing conductors comply with the minimum conductor sizes in Table G.5, except as required by Table G.7ADV.1 for cord connected equipment, or Annex DVH for permanently connected equipment  |  | N/A |

| National differences for country(ies): Canada and United States of America |   |                 |         |
|--|---|-----------------|---------|
| Clause   | Requirement + Test  | Result - Remark | Verdict |
| 5.7.7  | Equipment intended to receive telecommunication ringing signals complies with a special touch current measurement tests.  |                 | N/A     |
| 6.5.1  | PS3 wiring outside a fire enclosure complies with single fault testing in B.4, or be current limited per one of the permitted methods.  |                 | N/A     |
| Annex F (F.3.3.8)  | Output terminals provided for supply of other equipment, except mains, supply are marked with a maximum rating or references to which equipment it is permitted to be connected.  |                 | N/A     |
| Annex G (G.7.1)  | Permanent connection of equipment to the mains supply by a power supply cord is not permitted, except for certain equipment, such as ATMs.  |                 | N/A     |
| Annex G (G.7.3)  | Power supply cords are required to have attachment plugs rated not less than 125 percent of the rated current of the equipment.   |                 | N/A     |
|  | Flexible power supply cords are required to be compatible with Article 400 of the NEC, and Tables 11 and 12 of the CEC.   |                 | N/A     |
| Annex G (G.7.5)  | Minimum cord length is required to be 1.5 m, with certain constructions such as external power supplies allowed to consider both input and output cord lengths into the requirement. Power supply cords are required to be no longer than 4.5 m in length if used in ITE Rooms.   |                 | P       |
| Annex H.2  | Continuous ringing signals under normal operating conditions up to 16 mA only are permitted if the equipment is subjected to special installation and performance restrictions.   |                 | N/A     |
| Annex H.4  | For circuits with other than ringing signals and with voltages exceeding 42.4 V <sub>peak</sub> or 60 V d.c., the maximum acceptable current through a 2000 ohm resistor (or greater) connected across the voltage source with other loads disconnected is 7.1 mA peak or 30 mA d.c. under normal operating conditions. |                 | N/A     |
| Annex M  | Battery packs for stationary applications comply with special component requirements.   |                 | N/A     |
| Annex DVA (1)  | Equipment intended for use in spaces used for environmental air are subjected to special flammability requirements for heat and visible smoke release.  |                 | N/A     |
|  | For ITE room applications, automated information storage systems with combustible media greater than 0.76 m <sup>3</sup> (27 cu ft) have a provision for connection of either automatic sprinklers or a gaseous agent extinguishing system with an extended discharge.  |                 | N/A     |

| National differences for country(ies): Canada and United States of America |  |                 |         |
|--|--|-----------------|---------|
| Clause   | Requirement + Test   | Result - Remark | Verdict |
|  | Consumer products designed or intended primarily for children 12 years of age or younger are subject to additional requirements in accordance with U.S. & Canadian Regulations.  |                 | N/A     |
|  | Baby monitors additionally comply with ASTM F2951, Consumer Safety Specification for Baby Monitors.  |                 | N/A     |
| Annex DVA (5.6.3)  | For Pluggable Equipment Type A, the protection in the installation is assumed to be 20A.   |                 | P       |
| Annex DVA (6.3)  | The maximum quantity of flammable liquid stored in equipment complies with NFPA 30.  |                 | N/A     |
| Annex DVA (6.4.8)  | For ITE room applications, enclosures with combustible material measuring greater than 0.9 m <sup>2</sup> (10 sq ft) or a single dimension greater than 1.8 m (6 ft) have a flame spread rating of 50 or less. For equipment with the same dimensions for other applications, an external surface that is not a fire enclosure requires a min. flammability classification of V-1. |                 | N/A     |
| Annex DVA (10.3.1)   | Equipment with lasers meets the U.S. Code of Federal Regulations 21 CFR 1040 (and the Canadian Radiation Emitting Devices Act, REDR C1370).  |                 | N/A     |
| Annex DVA (10.5.1)   | Equipment that produces ionizing radiation complies with the U.S. Code of Federal Regulations, 21 CFR 1020 (and the Canadian Radiation Emitting Devices Act, REDR C1370).  |                 | N/A     |
| Annex DVA (F.3.3.3)  | Equipment for use on a.c. mains supply systems with a neutral and more than one phase conductor (e.g. 120/240 V, 3-wire) require a special marking format for electrical ratings. Additional considerations apply for voltage ratings that exceed the attachment cap rating or are lower than the "Normal Operating Condition" in Table 2 of CAN/CSA C22.2 No. 235."               |                 | N/A     |
| Annex DVA (F.3.3.5)  | Equipment identified for ITE (computer) room installation is marked with the rated current   |                 | N/A     |
| Annex DVA (G.1)  | Vertically-mounted disconnect switches and circuit breakers have the "on" position indicated by the handle in the up position  |                 | N/A     |
| Annex DVA (G.3.4)  | Suitable NEC/CEC branch circuit protection rated at the maximum circuit rating is required for all standard supply outlets and receptacles (such as supplied in power distribution units) if the supply branch circuit protection is not suitable.   |                 | N/A     |
| Annex DVA (G.4.2)  | Equipment with isolated ground (earthing) receptacles complies with NEC 250.146(D) and CEC 10-112 and 10-906(8).   |                 | N/A     |

| National differences for country(ies): Canada and United States of America |  |                 |         |

| Clause   | Requirement + Test   | Result - Remark | Verdict |
| Annex DVA (G.4.3)  | Where a fuse is used to provide Class 2 or Class 3 current limiting, it is not operator-accessible unless it is non- interchangeable.  |                 | N/A     |
| Annex DVA (G.5.3)  | Power distribution transformers distributing power at 100 volts or more, and rated 10 kVA or more, require special transformer overcurrent protection.   |                 | N/A     |
| Annex DVA (G.5.4)  | Motor control devices are required for cord-connected equipment with a mains-connected motor if the equipment is rated more than 12 A, or if the equipment has a nominal voltage rating greater than 120 V, or if the motor is rated more than 1/3 hp (locked rotor current over 43 A).  |                 | N/A     |
| Annex DVA (Annex M)  | For ITE room applications, equipment with battery systems capable of supplying 750 VA for five minutes have a battery disconnect means that may be connected to the ITE room remote power-off circuit.   |                 | N/A     |
| Annex DVA (Q)  | Wiring terminals intended to supply Class 2 outputs according to the NEC or CEC Part 1 are marked with the voltage rating and "Class 2" or equivalent; marking is located adjacent to the terminals and visible during wiring.   |                 | N/A     |
| Annex DVB (1)  | Additional requirements apply for equipment used for entertainment purposes intended for installation in general patient care areas of health care facilities.   |                 | N/A     |
| Annex DVC (1)  | Additional requirements apply for equipment intended for mounting under kitchen cabinets.  |                 | N/A     |
| Annex DVE (4.1.1)  | Some equipment, components, sub-assemblies and materials associated with the risk of fire, electric shock, or personal injury have component or material ratings in accordance with the applicable national (U.S. and Canadian) component or material requirements. Components required to comply include: appliance couplers, attachment plugs, battery back-up systems, battery packs, circuit breakers, communication circuit accessories, connectors (used for current interruption of non-LPS circuits), power supply cords, direct plug-in equipment, electrochemical capacitor modules (energy storage modules with ultra-capacitors), enclosures (outdoor), flexible cords and cables, fuses (branch circuit), ground-fault current interrupters, interconnecting cables, data storage equipment, printed wiring, protectors for communications circuits, receptacles, surge protective devices, vehicle battery adapters, wire connectors, and wire and cables. |                 | N/A     |
| Annex DVH  | Equipment for permanent connection to the mains supply is subjected to additional requirements.  |                 | N/A     |

| National differences for country(ies): Canada and United States of America |  |                 |         |
|--|--|-----------------|---------|
| Clause   | Requirement + Test   | Result - Remark | Verdict |
| Annex DVH (DVH.1)  | Wiring methods (terminals, leads, etc.) used for the connection of the equipment to the mains are in accordance with the NEC/CEC.  |                 | N/A     |
| Annex DVH (DVH.3.2)  | Terminals for permanent wiring, including protective earthing terminals, are suitable for U.S./Canadian wire gauge sizes, rated 125 percent of the equipment rating, and are specially marked when specified.  |                 | N/A     |
| Annex DVH (DVH.3.2)  | Wire binding screws are not permitted to attach conductors larger than 10 AWG (5.3 mm <sup>2</sup> ).  |                 | N/A     |
| Annex DVH (DVH.4)  | Permanently connected equipment is required to have a suitable wiring compartment and wire bending space.  |                 | N/A     |
| Annex DVH (DVH 5.5)  | Equipment connected to a centralized d.c. power system, and having one pole of the DC mains input terminal connected to the main protective earthing terminal in the equipment, complies with special earthing, wiring, marking and installation instruction requirements. |                 | N/A     |
| Annex DVI (6.7 )   | Equipment intended for connection to telecommunication network outside plant cable is required to be protected against overvoltage from power line crosses.  |                 | N/A     |
| Annex DVJ (10.6.1 )  | Equipment connected to a telecommunication and cable distribution networks and supplied with an earphone intended to be held against, or in the ear is required to comply with special acoustic pressure requirements.   |                 | N/A     |

## National differences for country(ies): Australia and New Zealand

| Clause   | Requirement + Test  |  | Result - Remark   | Verdict   |
|--|---|--|-------------------|-----------|
| Parts  | Impulse test  |  | Steady state test |           |
|  | New Zealand   | Australia  | New Zealand       | Australia |
|  | Parts indicated in Clause 5.4.10.1 a) <sup>a</sup>  | 2.5 kV<br>10/700 µs<br>7.0 kV for hand-held telephones and headsets, 2.5 kV for other equipment. 10/700 µs | 1.5 kV            | 3 kV      |
|  | Parts indicated in Clause 5.4.10.1 b) and c) <sup>b</sup>   | 1.5 kV 10/700 µs <sup>c</sup>  | 1.0 kV            | 1.5 kV    |
| <sup>a</sup> Surge suppressors shall not be removed.<br><sup>b</sup> Surge suppressors may be removed, provided that such devices pass the impulse test of Clause 5.4.10.2.2 when tested as components outside the equipment.<br><sup>c</sup> During this test, it is allowed for a surge suppressor to operate and for a sparkover to occur in a GDT. |   |  |                   |           |
| <b>5.4.10.2.2</b>  | After the first paragraph, <i>insert</i> new Notes 201 and 202 as follows:<br>NOTE 201 For Australia, the 7 kV impulse simulates lightning surges on typical rural and semi-rural network lines.<br>NOTE 202 For Australia, the value of 2.5 kV for Clause 5.4.10.1 a) was chosen to ensure the adequacy of the insulation concerned and does not necessarily simulate likely overvoltages. |  |                   | N/A       |
| <b>5.4.10.2.3</b>  | After the first paragraph, <i>insert</i> new Notes 201 and 202 as follows:<br>NOTE 201 For Australia, where there are capacitors across the insulation under test, it is recommended that d.c. test voltages are used.<br>NOTE 202 The 3 kV and 1.5 kV values for Australia have been determined considering the low frequency induced voltages from the power supply distribution system.  |  |                   | N/A       |
| <b>6</b>   | <b>Electrically-caused fire</b>   |  |                   | P         |
| <b>6.1</b>   | <b>General</b><br>After the first paragraph, <i>insert</i> the following new paragraph:<br>Alternatively, the requirements of Clauses 6.2 to 6.5.2 are considered to be fulfilled if the equipment complies with the requirements of Clause 6.202   |  |                   | P         |
| <b>6.6</b>   | After Clause 6.6, <i>add</i> the new Clauses 6.201 and 6.202 as follows:<br><b>6.201 External power supplies, docking stations and other similar devices</b> and<br><b>6.202 Resistance to fire—Alternative tests</b><br>(see special national conditions)  |  |                   | N/A       |

| National differences for country(ies): Australia and New Zealand |  |                 |         |
|--|--|-----------------|---------|
| Clause   | Requirement + Test   | Result - Remark | Verdict |
| <b>8.5.4</b>   | <b>Special categories of equipment comprising moving parts</b>   |                 | N/A     |
| <b>8.5.4.1</b>   | <b>Large data storage equipment</b><br>In the first dashed row and the second dashed rows<br><i>replace</i> 'IEC 60950-1:2005' with 'AS/NZS 60950.1:2015'.   |                 | N/A     |
| <b>8.6</b>   | <b>Stability of equipment</b>  |                 | N/A     |
| <b>8.6.1 and Table 36</b>  | <b>Requirements</b><br>1. Table 36, <i>insert</i> Footnote c at the end of the 'Glass slide' heading, and <i>add</i> a new Footnote c after the text of Footnote b in the last row of Table 36 as follows:<br>° The glass slide test is not applicable to floor standing equipment, even though the equipment may have controls or a display.<br>2. Table 36, fifth row, <i>insert</i> '201' at the end of 'No stability requirements'<br>3. Table 36, ninth row, <i>insert</i> '201' at the end of 'No stability requirements'<br>4. Table 36, <i>add</i> the following new footnote:<br>201 MS2 and MS3 television sets and display devices, designed only for fixing to a wall, ceiling or equipment rack, are not subjected to stability requirements only if the instructional safeguard of Clause 8.6.1.201 is provided. Otherwise, the glass slide requirements of Clause 8.6.4 and horizontal force requirements of Clause 8.6.5 apply.<br>5. Second paragraph beneath Table 36, <i>delete</i> the words 'MS2 and MS3 television sets' and <i>replace</i> with 'MS2 and MS3 television sets and display devices' |                 | N/A     |
| <b>8.6.1</b>   | After Clause 8.6.1 <i>add</i> the following new clauses:<br><b>8.6.1.201 Instructional safeguard for fixed-mount television sets</b><br>(see special national conditions)  |                 | N/A     |
| <b>Annex F Paragraph F.3.5.1</b>                                 | <b>Mains appliance outlet and socket-outlet markings</b><br><i>Replace</i> 'IEC 60320-2-2' with 'AS/NZS 60320.2.2'.  |                 | N/A     |

| National differences for country(ies): Australia and New Zealand |   |  |         |
|--|---|--|---------|
| Clause   | Requirement + Test  | Result - Remark                          | Verdict |
| <b>Annex G</b><br><b>Paragraph G.4.2</b>                         | <b>Mains connectors</b><br>1 In the second line <i>insert</i> 'or AS/NZS 3123' after 'IEC 60906-1'.<br>2 In the second line <i>insert</i> 'or AS/NZS 60320 series' after 'IEC 60320 series'<br>3 <i>Add</i> the following new paragraph:<br>10 A or 15 A 250 V flat pin plugs for the connection of equipment to mains-powered socket-outlets for household or similar general use shall comply with AS/NZS 3112 or AS/NZS 60884.1.   |  | N/A     |
| <b>Paragraph G.5.3.1</b>   | <b>Transformers, General</b><br>1 In the third dashed point <i>replace</i> 'IEC 61558-1 and the relevant parts of IEC 61558-2' with 'AS/NZS 61558-1 and the relevant parts of AS/NZS 61558.2'<br>2 In the fourth dashed point <i>replace</i> 'IEC 61558-2-16' with 'AS/NZS 61558.2.16'.   |  | N/A     |
| <b>Paragraph G.7.1</b>   | <b>Mains supply cords, General</b><br>In the fourth dashed paragraph, <i>replace</i> 'IEC 60320-1' with 'AS/NZS 60320.1'  | Should be evaluated in national approval | N/A     |
| <b>Table G.5</b>   | <b>Sizes of conductors</b><br>1 In the second row, first column, <i>delete</i> '6' and <i>replace</i> with '7.5'<br>2 In the second row, second column, <i>delete</i> '0,75' and <i>replace</i> with '0.75 <sup>b</sup><br>3 <i>Delete</i> Note 1.<br>4 <i>Replace</i> 'NOTE 2' with 'NOTE:'.<br>5 <i>Delete</i> the text of 'Footnote b' and <i>replace</i> with the following:<br><sup>b</sup> This nominal cross-sectional area is only allowed for Class II appliances if the length of the power supply cord, measured between the point where the cord, or cord guard, enters the appliance, and the entry to the plug does not exceed 2 m (0.5 mm <sup>2</sup> three-core supply flexible cords are not permitted; see AS/NZS 3191).<br>6 In Footnote c <i>replace</i> 'IEC 60320-1' with 'AS/NZS 60320.1'<br>7 In Footnote d <i>replace</i> 'IEC 60320-1' with 'AS/NZS 60320.1' |  | N/A     |
