

FIRMWARE UPGRADE INSTRUCTIONS

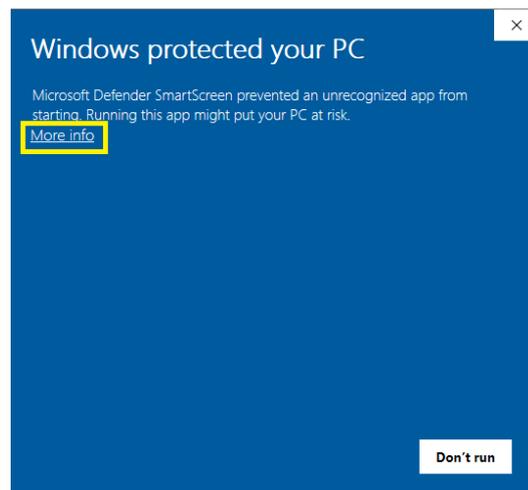

Mackie CR StealthBar Firmware Upgrade for PC • June 2022

Instructions

1. Download the zipped upgrade package and save it to Local Disk (C:). Right click the “mediatool.exe” file and click **Run as administrator**.

Name	Status	Date modified	Type	Size
 READ ME FIRST		6/22/2022 6:50 AM	Adobe Acrobat D...	322 KB
 mediatool		6/22/2022 6:50 AM	Application	81,315 KB

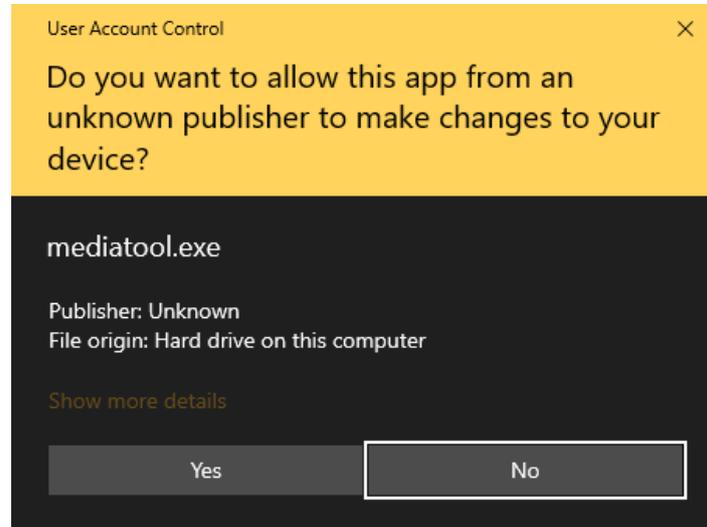

2. You may or may not receive this prompt. If you do, click on **More info**.

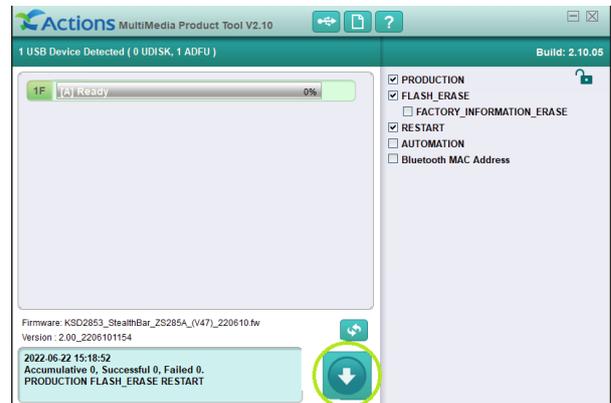

3. Select **Run anyway**.

4. If you see this prompt, Click **Yes**. The installation app will open. You do not need to change any of the checkboxes in the updater window. If you accidentally change an option, feel free to exit out of the app and relaunch it.

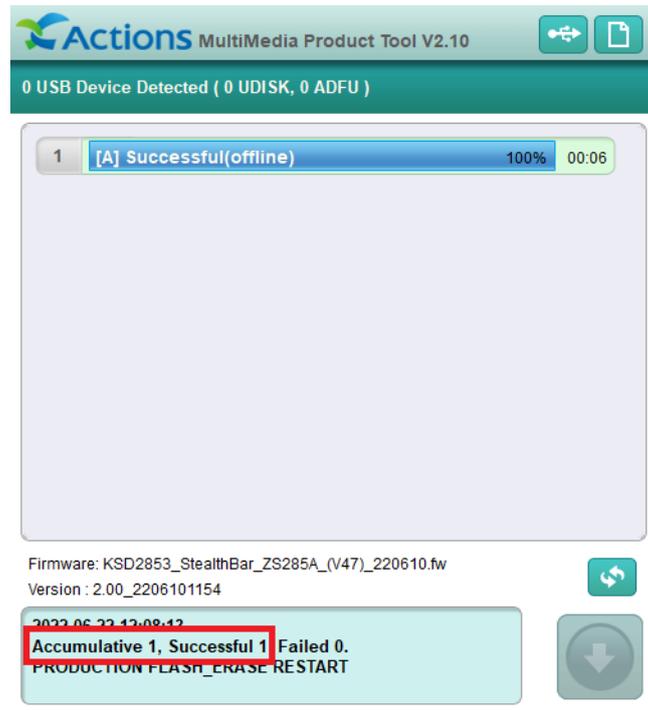

5. Connect the USB-C cable in-between the PC and the StealthBar. Afterward, connect the power adapter to the StealthBar but **DO NOT** power it on.
6. Press and hold the "EQ" and "Source input" buttons at the same time. While holding the buttons down, turn on the Stealthbar. Release the buttons once the app's Down Arrow Button turns to a solid color.

7. Click the down arrow button to initiate the upgrade process.

9. The app will show **Successful** upon completion and the button will return to gray. The update is now complete!

10. Feel free to close the app. A power cycle is recommended before using the updated StealthBar. Turn the StealthBar off, then on again. Enjoy!
