

# RELEASE NOTES

DLZ Creator V1.0.2 • May 2023

## Introduction

These release notes describe changes and upgrades to the Mackie DLZ Creator firmware since Version 1.0.

New DLZ Creator firmware and installation instructions may be found at the link below under the Download & Resources section.

<https://mackie.com/dlz>

## System Requirements

- Windows 11
- macOS 10.12 or higher required

**NOTE:** A flash drive or microSD card is also required for the updates.

## Supported Devices

- DLZ Creator

## DLZ Creator V1.0.2

The following is a list of items that have been added, changed or fixed since DLZ Creator V1.0.

- Added 'MUTE' to headphone mixer for 'Quick Mix' and 'Custom Mix'.
- Implemented a way to bypass or clear the system lock.
- Fixed sample 'Edit Start' point not persisting after power cycle on first playback.
- Fixed UPD update freeze issues when initiated from a sub-directory.
- Fixed Bluetooth device shows as "???" during setup assistant when connected.
- Fixed Bluetooth disconnects when loading snapshot.
- Updated Quick Controls, now 'remember' previous screens after factory reset.
- Fixed issue when editing samples, where the first playback didn't recognize the changes.
